

If you've started a part-time job, babysitting, or even earning money from a side hustle, you might've heard the term "direct deposit." But what exactly is it?

Direct Deposit = Money Straight into Your Account

Direct deposit means your paycheck (or any money someone sends you, like from a job) goes straight into your [bank account](#). No paper checks, no waiting in line, and no worry about losing it.

Why it Matters

- It's Fast: You usually get paid faster than waiting for a check.
- It's Safe: No paper check means no risk of losing your money or having it stolen.
- It's Easy: Your money shows up automatically on payday in your account.

Real Life Example:

Let's say you're working a summer job. Instead of getting a check and needing a ride to deposit it, your money goes straight into your Interior Federal account, and you can use it with your debit card or manage it in our mobile app.

How to Set Up Direct Deposit

If your job offers direct deposit, you will need to fill out their direct deposit form and they'll need your:

- Your Interior Federal account number
- Interior Federal's routing number (254074442)

INTERIOR FEDERAL FEATURES

Download our App

Manage your money easily, track your spending, and start building smart financial habits, right from your phone! Available in the App Store and in Google Play.
